

**Controls from Griesser.
for sliding shutters**

CONTROL – AUTOMATICALLY GOOD.

Griesser offers highly functional solutions for the automation of sliding casements that combine convenience and reliability and that clearly support the company's claim to be the innovation leader in window casements. Single elements or entire groups can also be moved via button, bus control or even remote control. Coupled to a house bus, programming or wireless control can now also be used for opening.

Control with BiLine

Control with KNX and Easy
